Onsite calibration of workshop tools

Our calibration service includes:

- Calibration of your tools correctly to the required British standards
- Assessment of your site to Dealer group standards etc.
- Completion of your calibration file with individual certification on the day of test.
- Provision of test equipment calibration certificates traceable to national standards.
- Copies of our registration certificates to ISO9001: 2008.
- An engineers report is provided detailing all issues on site.
- Your system is fully maintained by us for you on every visit.
- All our engineers are fully trained and qualified.
- All makes of equipment are calibrated.
- All tools are adjusted onsite if required.
- An online portal and monthly group reports are provided to help you control your sites.

Every site is provided with a calibration file :

1) The Onsite calibration file which is completed on the day contains:

- Copy of Engineers Training record.
- Copy of Our UKAS certificates to prove traceability of our equipment.
- An engineers report detailing any failed or adjusted items on that visit.
- Full inventory list of all your tools that have been calibrated.
- Calibration certificate of each tool or made available in PDF format.
- Planning document detailing their next calibration date.

2) Oakrange Portal:

- Contains all certification on a web based portal for you to access at any time 24hrs.
- We will provide portal numbers for each site in a monthly management report.

3) Management reports :

- Oakrange will provide you with a monthly report detailing:
- Which site has been visited that month.
- The value of spend per site and the number of items.
- A 12 month report at the end of the year for all sites..
